Work Experience Igugulethu

Consulting

(2022-2023)
Worked at Igugulethu Consulting as IT Support. This was vacation work.

Singular Systems

(2025)

I worked at Singular Systems as part of a Learnership program in which I was training towards being a full-stack development.

Skills Panda
(2025-2026)

I was working at Skills Panda as part of a team that is building an HR system. I was working as a full stack developer using PHP and Laravel

---

Software Development

SDLC (Agile, Waterfall, Scrum) ASP.NET

Core Web API (RESTful)

Projects

- Created an e-commerce website for an engineering company that showcases its services and allows for a simple way to get quotes. I made use of HTML, CSS, PHP as well as Javascript to create this project.
- Helped develop a mobile application for a jewellery store that allows for its customers to shop from their devices. Android Studio was used to create the application, and the programming was done in Java.
- Created a self-service kiosk system with the use of ASP.NET Core Web APIs (C#), SQL Server as well as REACT node.js. This self-service allows users to register at the kiosk and place orders. Real-time updates and JWT tokens were also integrated.
- Built an HR system with the use of PHP and Laravel that companies can use to generate payslips for companies.

Honours and Awards

- Golden Key International Honor Society (2024 – Present)
